OUR NEW MONETARY AUTHORITY

Or ... how much new money does our economy need this year?
Yes. You see, our nation grows from year to year in population. That means the nation must have MORE FOOD, CLOTHING, HOMES. This requires more money in our money supply.

But we don’t want inflation (too much money) or deflation (too little money).
So how can the size of the money supply be controlled?

By the brand-new MONETARY AUTHORITY. In the Treasury Department in Washington, D.C.

The MONETARY AUTHORITY is part of the executive branch, and takes the place of the Federal Reserve Board which has been abolished.

1) The Monetary Authority establishes how much new money is created each year to allow goods and services to move freely in the economy.

2) Congress decides how much money will be spent and for what.

3) The Treasury Secretary pays out the money authorized by Congress. If there is no money left to pay in the government’s account, the Secretary will create money, **BUT ONLY UP TO THE LIMITATION SET BY THE MONETARY AUTHORITY.**
So how can the size of the money supply be controlled?

There will be 9 PUBLIC members, appointed by the President, with the consent of the Senate. Each member serves for 6 years.
Hold on just one minute!!! How can I trust these 9 people?

How do I know they will be working for the welfare of all citizens, not the plutocracy?

Will they feel independent and safe from money and power?

Let’s see what the NEED ACT says.....
The NEED ACT says:

“The Secretary of the Treasury may not intervene in any matter or proceeding before the Monetary Authority, unless otherwise specifically provided by law.

The Secretary of the Treasury may not delay, prevent, or intervene in:

- The Monetary Authority.
- The Authority’s decision of the amounts of money to be created.
- The most efficient method of disbursement consistent with the appropriations of Congress.

…That sounds good... but... this is really important....

How can the citizens trust this Monetary Authority?
How about this?

The NEED ACT says:

“Not more than 4 of the members of the Monetary Authority may be members of the same political party.”

So, there have to be, at a minimum, 3 parties represented!

….Better...
The NEED ACT sets the following targets:

“The Monetary Authority shall pursue a monetary policy ... that the supply of money in circulation should not become inflationary nor deflationary...

...promote effectively the goals of maximum employment, stable prices, and moderate long-term interest rates.”

Describe what these 9 people will be working on?

……Much better….
There will be public reports every quarter of the year.

Whenever the target set by the Monetary Authority differs by 0.5% from the actual money supply, the Secretary of the Treasury will report this to Congress every quarter of the year.

0.5% means a difference of $5,000 for every million dollars in the money supply.

Will the citizens know what is going on?

…Much better…
But the most important change in our money system is ..... 

..... given to us by the NEED ACT ..... 

..... allowing the Monetary Authority to function for all the citizens..... 

.....yes? .....yes?
Think of this.

Democracy includes the absence of privilege to any group.

The NEED ACT removes the most powerful privilege of all – the privilege of banks to manufacture money by issuing loans!
We will have U.S. Money -- issued by our government debt-free. Our money supply will not be owed to bank corporations. The money will be an asset to all the citizens of the U.S.

Here is a respected American.....

DAVIS RICH DEWEY, AMERICAN ECONOMIST AND STATISTICIAN
(1858 – 1942)

“The underlying idea in the greenback philosophy…is that the issue of currency is a function of government, a sovereign right which ought not to be delegated to corporations.”

Yes! Yes!
Here is a respected Canadian.....

WILLIAM LYON MACKENZIE KING, 10TH PRIME MINISTER OF CANADA (1935-1948)

Until the control of the issue of currency and credit is restored to government and recognized as its most conspicuous and sacred responsibility, all talks of the sovereignty of Parliament and of democracy is idle and futile.

— William Lyon Mackenzie King —
The Monetary Authority will be protecting our common welfare!
THE END
